PROFILE

As a MERN Stack developer, I enjoy building practical, fast and user-friendly web applications. I work confidently with MongoDB, Mongoose, Express.js and Node.js to create clean, fast and reliable backend system. Also build smooth interface and batter UX using React.js and Next.js. I also have hands-on experience with WordPress, including custom theme and plugin development which helps me deliver flexible solutions for different types of projects.

WORK EXPERIENCE

Webtricker

2023 Sep - PRESENT

MERN Stack Developer

- Collaborate with team members to build clients projects from Upwork and Fiverr.
- Converted company websites from WordPress to Next.js and React.js

PROJECTS

ExpressCronJob

- Built an automated scheduler that updates prices and orders for subscribed client websites.
- Created a secure admin panel for managing users, subscriptions, and system tasks.

ANS Music

- Developed a fully-customizable WordPress website for ANS Music Limited, featuring content-rich pages, services, and support
- Built dynamic admin functionality for managing distribution, royalty reporting, and artist engagement seamlessly.

United Adarsha College

- Built a responsive WordPress website for United Adarsha College with dynamic notices, news, and faculty sections.
- Added easy-to-manage admin features for updating content, events, and academic information.

EDUCATION

- BA from National University

2018 - 2022
